Saro Babayan
Senior Frontend Developer

I am a front-end (React.js) developer with over 7 years of experience in web development, specializing in building modern, user-friendly, and high-performance interfaces. My expertise includes React, TypeScript, Redux Toolkit, REST APIs, Next.js, Webpack, Vite, Babel, and other technologies such as HTML, CSS, SCSS, LESS, Ant Design, GSAP, MUI, and Tampermonkey.
I focus on writing clean, scalable, and maintainable code while ensuring optimal performance and usability. I also have experience integrating REST APIs and utilizing various tools to streamline the development process.

EXPERIENCE

SENIOR REACT.JS DEVELOPER at Notamedia (remote)
Russia, Moscow | Jan 2022 - Jan 2025

 Development and implementation of various services for a bank project built on **Bitrix24 (MSP Bank)** from scratch, using technologies such as **React.js**, **Redux (Redux Toolkit)**, **TypeScript**, **Ant**, **Git**, **GitLab**, and other development tools. Ongoing maintenance and modernization of the bank's services to ensure relevance and compliance with the strict regulations of the industry. Code review for team members, discussing and implementing solutions to optimize processes and improve service performance, introducing new functionalities in line with business requirements, and ensuring security and compliance with regulatory standards. Coordination with other teams for the integration of new services and improvements, conducting regular testing and performance analysis, fixing bugs, and addressing technical debt. Supporting documentation and training new team members to improve the overall quality of the team's work.

PROJECTS:

Digital Platform MSP.RF

REACT.JS DEVELOPER at Concept Studio
Armenia Yerevan | Mar 2019 - Dec 2022

Website development using **React.js**, as well as **Next.js**, **Redux (Redux Toolkit)**, **ANT**, **GSAP**, **MUI**, **Git**, and many other development technologies. Responsibilities included: Estimating project timelines and complexity, Structural (architectural) development, Implementation of user and functional interfaces, Website animation, Code optimization for higher performance and resource efficiency, Ensuring high **Google Performance** scores, Ongoing support and modernization of code, Refactoring projects, considering legacy features and new business requirements.

PROJECTS:

Concept Studio   Invest In Armenia   Parajanov Museum   Murakami City   WestEast

FRONTEND DEVELOPER at ZOOM GRAPHICS
Armenia Yerevan | Jan 2017 - Feb 2019

Front-end development of websites, including the creation of visual layouts using **HTML** and styling with **CSS (SCSS, LESS)**, as well as animations implemented with **JavaScript (jQuery)** and third-party libraries. The goal was to enhance user interaction with the interface while maintaining a high Google Performance score. Responsibilities also included refining existing code and keeping it up to date, as well as developing new features, such as implementing algorithms for calculating various digitized forms commonly found in fintech websites. Additionally, optimizing code to ensure faster and more efficient website performance was a key focus.

PROJECTS:

ACBA Digital Platform   EasyPay / Armenian financial services platform

FAST Foundation (Foundation for Armenian Science and Technology)

Polixis / Regulatory Technology solutions for financial institutions.

Normancredit   Edelbloom   Lab Naturel   Harvy Fruits
